

Family Carers Ireland

No one should have to care alone

Emergency Scheme

Social Story

This leaflet explains the Family Carers Ireland Emergency Scheme.

In partnership with...

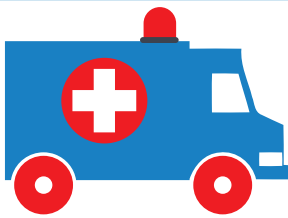

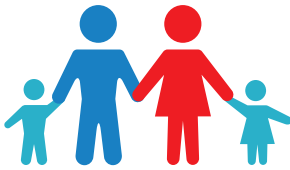

Sometimes the person who cares for me at home - like **my mum or dad** - may need to **go to hospital**.

Sometimes they know before they need to go and they can **plan the trip**.

Sometimes it might be an **emergency**.

They want to make sure **I am safe** and looked after if they go to hospital in an emergency.

So the person who cares for me wants to **join** the Family Carers Ireland Emergency Scheme.

Family Carers Ireland
is a charity that **helps** people.

If they join the Family Carers Ireland Emergency Scheme, they fill out a plan all about **me**.

I can help them to write the plan if I want to.

The plan is about:

- what I can do on my own.
- what help I need.

As part of the plan we name other **people** who could care for me in an emergency.

Sometimes this might be **a person I know**.

Sometimes it might be a Garda and/or two volunteers that will **visit me**.

To let people know they are in the scheme, the person who cares for me **gets an emergency card**.

They will keep this card in their **wallet, purse or pocket**.

If there is an emergency someone will find the card and **phone** the number on the card.

The person who answers the phone will make sure that someone comes to **care** for and **support** me.

Sometimes they might need to take me to the **hospital** for a few days.

Sometimes I will be able to stay at **home**.

DON'T

I don't need to worry because the people who will come to help me will make sure I am safe.

They will know how to help me because it is **in the plan**.

When the person who usually cares for me is better, **they will come home** again.
